# Sujit Sharma Poudel

Software Engineer

Kathmandu , Nepal • 9704142822 • SujitSharmapoudel@gmail.com

@ https://www.linkedin.com/in/sujit-sharma-poudel-802738181/ @ https://github.com/psujit11

Dedicated .NET developer with strong foundation in C# and the .NET Framework. With a problem-solving mindset, I am committed to staying up-to-date with the latest industry trends and best practices in the software development. I am ready to embark on a challenging journey to further enhance my expertise in the dynamic world of .NET development.

## EXPERIENCE

### Senior Software Engineer — Remote

*Cloudpro AI* — Mar, 2025 - Present

- **Process & Performance Improvements:** Identified areas for workflow and performance optimization, implementing changes that reduced technical debt, improved application response times, and strengthened overall system reliability.
- **Collaborative Delivery:** Engaged with cross-functional teams to refine requirements, propose technical enhancements, and deliver incremental improvements that aligned with organizational objectives and improved user satisfaction.
- **Continuous Improvement Mindset:** Actively recommended and adopted best practices in coding standards, architecture, and deployment processes, contributing to higher development efficiency and long-term product stability

### Software Developer — Naxal,Kathmandu

*Codebee Nepal Pvt Ltd* — Jul, 2025 - Jul, 2026

- **Full-Stack .NET Development:** Contributed to both legacy and modern application ecosystems, working with .NET Framework 4.5 and Blazor (.NET 9.5) to enhance and maintain business-critical systems.
- **Mobile Development & Modernization:** Assisted in developing and optimizing mobile-ready Blazor Hybrid solutions, improving accessibility and user engagement across platforms.
- **Agile and Sprint Methodology:** Worked in a team coordination to deliver new features and solve the bug in a 14 day sprint cycle.

### Associate Software Engineer — Chabahil, Kathmandu

*Clover Tech Nepal Pvt Ltd* — Apr, 2023 - Jun, 2025

- **Web Application Development:** Designed, developed, and maintained robust web applications using .NET and C#, delivering scalable, high-performance, and secure solutions tailored to complex business needs. Utilized Clean Architecture principles to ensure long-term scalability, testability, and reliability by decoupling application layers and aligning with modern development best practices.
- **Collaborative Problem Solving:** Partnered with cross-functional teams and stakeholders to identify project requirements, align solutions with organizational goals, and ensure on-time delivery.
- **Troubleshooting & Remediation:** Swiftly identified and resolved application issues to ensure uninterrupted service, enhancing application performance and user satisfaction.

## EDUCATION

### Bachelor of Science in Computer Science and Information Technology — Kathmandu

*Asian School Of Management and Technology,Tribhuvan University* — Oct, 2019 - Oct, 2023

- **Percentage:** 77.55%
- **Credit Hours:** 126
- **Key Coursework:** C programming, Discrete Structure, Data Structure and Algorithms, Theory of Computation, Software Engineering

**Final Year Project:** Toxic Comment Classification.
A web based app that extracts the comments from the YouTube and classify the comment as toxic or not using Binary relevance with SVM and MNB model.

### Higher Secondary Education (+2 Science) — kathamandu

*Kathmandu Model Secondary School* — Jul, 2017 - Aug, 2019

- **Board:** National Examination Board (NEB)
- **CGPA:** 3.23
- **Major Subjects:** Physics, Chemistry, Mathematics

**Secondary Education (10th Grade – SEE)** Kathmandu

*Bhanubhakta Memorial Higher Secondary School* Feb, 2004 - Feb, 2017

- **Board:** National Examination Board (NEB)
- **GPA:** 3.70

## PROJECTS

### RentalBody

Rental Buddy is a marketplace application that allows users to both rent items and offer items for rent. Built using ASP.NET MVC, it offers a user-friendly interface and essential e-commerce functionalities, including an "Add to Cart" feature, item deletion from the cart, and the ability to add items to a wishlist. The front end is designed using Bootstrap, ensuring responsive and appealing layouts to enhance user experience. as the functionality of registration, add to cart, view details, checkout.
Technologies Used: ASP.NET MVC, Bootstrap
https://github.com/psujit11/Rental-Buddy-/tree/master/Rental

### Customer Relationship Management Application(API)

This CRM application facilitates comprehensive lead management by enabling users to create, track, and manage leads effectively. Leads and customers can be assigned to sales personnel, enhancing sales operations and accountability. The solution employs Identity Server for secure authentication, adhering to Clean Architecture principles, which promote maintainability, scalability, and testability. Built using the interface-service pattern with a generic repository, it offers robust role-based authentication and authorization for fine-grained access control and enhanced data security.
Technologies Used: ASP.NET Core (Minimal API), Identity Server, Clean Architecture, Interface-Service Pattern, Generic Repository Pattern
https://github.com/psujit11/CRMIRpattern

## TRAINING/CERTIFICATIONS

**Complete SQL & Relational Database Management System** 2024

*Udemy*

- Relational Databases
- Data Definition Language(DDL)
- Data Manipulation Language (DML)
- Advanced DDL & DML statements
- Working with multiple tables

## SKILLS

.NET Core, Entity Framework Core, C#, C, MS-SQl, Asp.Net MVC, ABP Framework, Asp.Net Web API, TypeScript, PostgreSQL, MySQL, MS-OFFICE PACKAGE, google workspace, Domain-Driven Design, C++, Git, JIRA, Mobile Development with MAUI, Blazor, Agentic AI, Python, jQuery

## LANGUAGE

Nepali, English, Hindi
